Protect What We Value Most.

A scalable, flexible crisis management solution for K-12 schools

Sielox
Class
Crisis Lockdown Alert Status System

Real-time Visibility When Every Second Counts.

Knowledge is a powerful tool.

Getting a handle on crisis situations in our schools and our university campuses is on the minds of everyone these days – students, parents, educators and law enforcement alike. Having a planned response and reliable solution that addresses the crisis quickly can make the difference between chaos and stability and loss of lives or lives saved. We shouldn't have to rely on educated guesses when so much is at stake.

Get the complete picture to act fast and protect what we value most.

Monitor, Assess and Act.

Visibility to save the day.

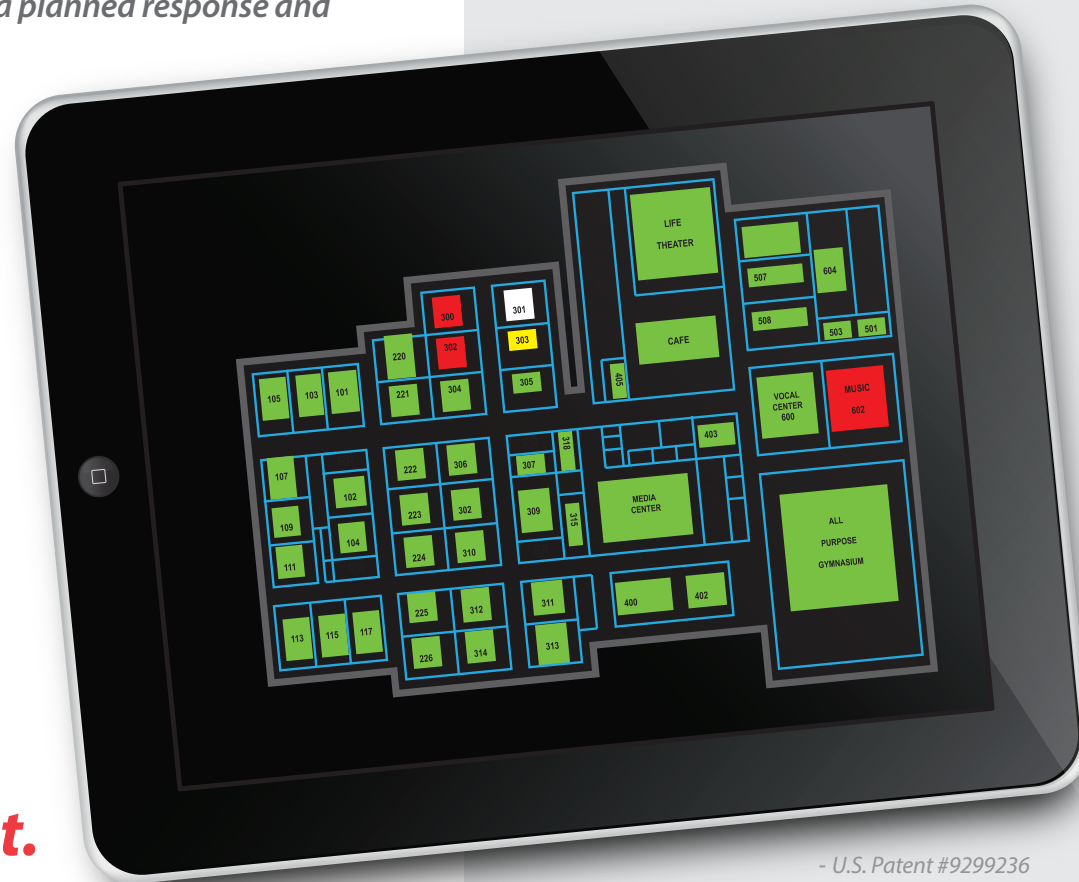

With the use of Class™, Crisis Lockdown Alert Status System, schools and universities have an effective solution for response in emergency situations. Developed by Sielox, a leading manufacturer of security management systems since 1979, Class provides real-time classroom status, notification and updates to administrators, security and first responders with a graphical map, email or text to make split-second decisions. The system is secure and easy to install – simply add to your existing network.

Sielox Class

Crisis Lockdown Alert Status System

Crisis Lockdown Alert Status System

Educators send color-coded alerts to administrators, security and first responders – either through networked devices, RFID readers, and push buttons. Law enforcement and first responders receive a dynamic floor plan with real-time, accurate updates on their mobile phone, tablet or laptop.

- U.S. Patent #9299236

Class™
A Patented Crisis Lockdown Alert Status System for schools and universities - Use for Daily Incidents and Crisis Events
