

## Fast & Easy access control up to 40 doors

Control and manage your security events in less than a second from your desktop, tablet or mobile device – from AnyWare. You’re in control – you can easily deploy, manage and expand your access control requirements on the fly using LAN, WAN, WiFi and high-speed cell (3G, 4G, LTE). Sielox AnyWare is a plug-and-play, browser-based access control solution affordable to small and mid-sized organizations.

AnyWare is a simple, scalable design suitable for a variety of security environments, managing access control applications with up to forty doors. And the browser-based system can connect to any url and pop up a variety of notifications.

Using an IT-friendly network appliance, AnyWare is ready to configure in a matter of minutes. And used in conjunction with Sielox’s industry leading IP 1700 controllers, AnyWare provides a cost-effective, easy-to-use yet robust access control feature set.

Any Browser, Any Device

Fast and easy utilizing templates
