

# Pinnacle Web – GO-Global

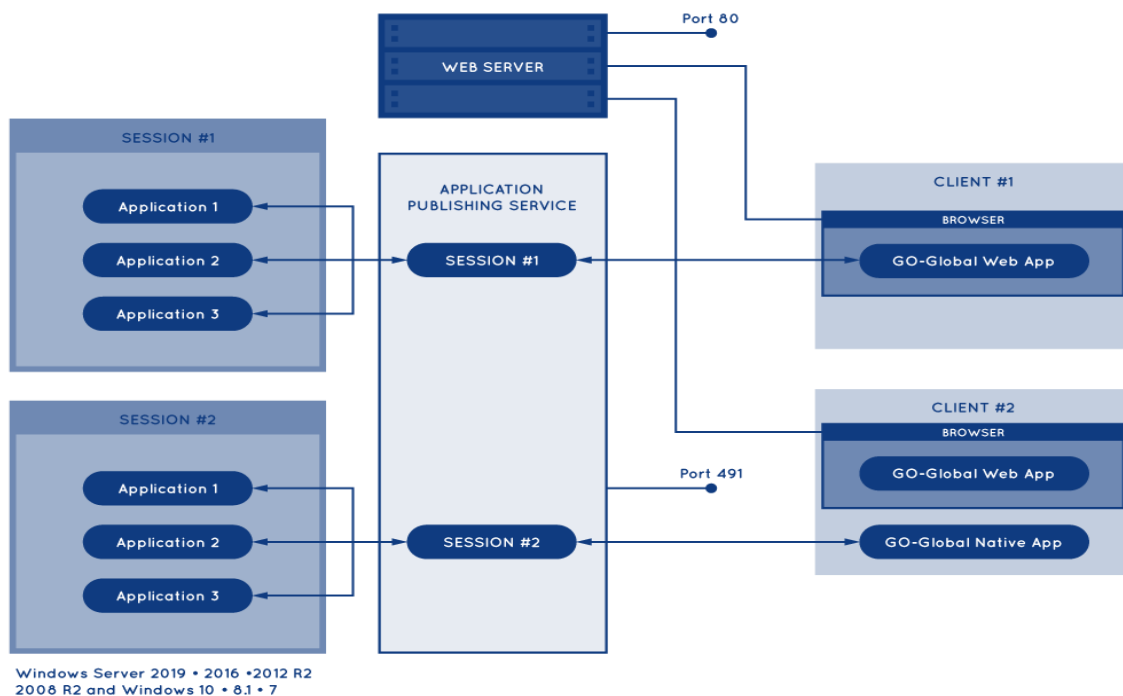

Control your Pinnacle System from any browser or mobile device.

GO-Global from GraphOn Corporation is a third-party software solution that Pinnacle users can license to expand beyond the Windows Operating System. Using GO-Global, Pinnacle can be accessed from any computer in the network through any Web browser or from any mobile device.

The Pinnacle Web application is installed on the same computer that is running the Pinnacle database server. All updates or upgrades are performed at the database server – eliminating the need to update the clients.

Pinnacle and all its data are secure on a central server behind the firewall. Transmissions are fully encrypted with Secure Socket Layer (SSL) and 256-bit AES encryption.

Pinnacle Web Client allows you to run the Pinnacle application, Pinnacle utilities, and any other programs that you expose on the virtual desktop to the operator.

Pinnacle Web Licenses are available only for Standard, Plus or Professional and include 1 Pinnacle Web License seat for either workstation or mobile device. See Sielox Price Book - Section 4 Pinnacle – Windows OS.
