

LOCKDOWN HEADQUARTERS

Sielox products and services empower systems integrators to configure a wide range of tailored solutions to meet different needs using the same powerful 2700 Controller, which simplifies service and support and reduces the number of products that need to be stocked and trained on.

Lockdown alert level and physical electronic locking of perimeter and interior doors from Sielox are the most comprehensive security layers in the marketplace today.

Sielox's portfolio delivers cost-efficiency for tangible Return on Investment (ROI) improvements and lower overall Total Cost of Ownership (TCO). Equally important, our portfolio is structured to provide partners with best-in-class OEM technology partners for both standalone and integrated solutions like wireless locks.

MCM Integrated Systems of Van Nuys CA has been a Sielox Certified Integrator since 1986. Rich McMillan, President of MCM, has a unique view of the access control industry based upon the success of his company, "Our industry is becoming increasingly complex and technically challenging, especially when it comes to access control. Some of our competitors handle many different access control product lines, requiring them to be Jacks-of-all-Trades, and masters of none. At MCM, we are specialists."

"Sielox listens to customers and to Sielox Certified Integrators and are very responsive to our needs. More importantly, they do what they say they are going to do. "

Sielox®

Become a Certified Sielox Integrator

Sielox has provided innovative security layered systems to select integrators for more than forty years. The company's unique and highly focused integrated suite of access and emergency notification solutions has proven that it offers the right combination for any size facility across all markets. The company's go-to-market strategy is built on a network of predominantly regional and local systems integrators, which continues to provide value-added solutions to the end-user.

Sielox offers a portfolio of advanced lockdown solutions designed for stand-alone or integrated implementation, including: the Pinnacle® Advanced Access Control and Event Management Platform, the Intelligent 2700 Controller, the powerful CLASS Crisis Lockdown Alert Status System™ (CLASS), and the AnyWare™ Browser-Based Access Control Platform.

AnyWare is a plug-and-play, browser-based access control solution affordable to small and mid-sized organizations. In today's world, you need to control and manage your security requirements from your desktop, tablet or mobile device. AnyWare allows you to easily deploy, manage and expand your access control requirements on the fly for up to 40 doors.

The marriage of advanced management software with an intelligent controller from a single vendor has been a proven technology and application success for Sielox Certified Integrators and End Users since 1979. Built upon the Sielox access control innovation legacy, Pinnacle 11 is a system designed with multiple layers of scalable control and the 2700 controller is unmatched in capabilities and serviceability.

Innovation continues with the multiple award-winning CLASS - Crisis Lockdown Alert Status System - providing critical situational awareness benefits to First Responders. CLASS dramatically improves emergency response time with real-time status updates to aid in response and resource deployment for any facility. First Responders no longer walk blindly into harm's way by viewing dynamic floor plans and chat in real-time, with updates displayed on their mobile phone, tablet or patrol car laptop.

With more than 250,000 controllers and tens of thousands of access control software systems installed since our start in Silicon Valley, Sielox continues to lead the industry with customer centric solutions, OEM integration like wireless locks and expert technical support.

About Sielox

Sielox Layered Security Systems provide a smart way to protect people, property and assets with the highest levels of performance, reliability and cost-efficiency. Since 1979, Sielox has built its expertise working with integration partners and end-users in all types of facilities. Our "Made in USA" lockdown solutions include the AnyWare Browser-Based Access Control Solution, CLASS Crisis Lockdown Alert Status System, 2700 Intelligent Controller and Pinnacle Advanced Access Control Software integrated with leading manufacturer wireless locks.
